

# CASE STUDY

# Company Background

*A Indian electrification and automation company came to Tanaashi in order to improve their job work efficiency...*

**\$1.0 Bn+**  
**Turnover**

 **3000+**  
*SKU's* **250+**  
*Daily Movement of Motors* **10+**  
*Outside Manufacturing Partners* **6+**  
*Manufacturing Locations*

# The Challenge

*Poor communication between supply chain & vendor.*

*Order fulfilment with customized and standard SKU's.*

*Visibility & Traceability of subcontractor shop floor.*

*Real Time view of Motor status.*

*"Reward & Penalize Program" for the vendors.*

*Enhancing overall  
On-time Delivery and  
Quality expectations:*

# The Solution

**Tanaashi came up with Job Work Portal – with an ability to capture data from CSV/XL files generated from SAP.**

## ↓ Company Log-in

**Loading Plan:** Ability to Upload Loading Plan on the vendors from an XL / CSV sheet.

**Loading Plan:** Ability to view the Loading Plan given by the customer and Plan production. Escalate contingency or any limitations to the client.

**Dispatch Schedule:** Ability to inform the customer on despatch planning of the motors.

**Dispatch Schedule:** Ability to confirm to the vendor on the despatch for the day.

**Despatch:** Ability to despatch motors against confirmation received.

**Receipt of Motors:** Ability to receive motors as per the confirmed despatch – check pendency etc

**Rework & Despatch:** Receipt of Rejected motors and re-despatch.

**Rejection Of Motors:** Track Motor rejection against the Despatches received

## ↑ Vendor Log-in

# Job Work Portal Impact

***Complete Supplier  
Collaboration***

***Harmonization Of Job Work***

***Visibility & Traceability of  
Vendor Shop Floor***

The support of our clients and continuous efforts has helped us achieve the milestone.

Looking Forward for Your Support
